TOXICOLOGY

AUTHOR INDEX

Volume 46 (1987)

Effects of ozone on lung and somatic growth. Pair fed rats after ozone exposure and recovery periods (**Ozone alters lung growth in ways likely to be detrimental and changes persist after exposure stops**)
by W.S. Tyler, N.K. Tyler, J.A. Last, T.J. Barstow, D.J. Magliano and D.M. Hinds (Davis, CA) . . . . . 1—20

Peroxidation of brain lipids following cyanide intoxication in mice (**Diene conjugation after KCN is dose- and time-dependent and is prevented by diltiazem**)
by J.D. Johnson, W.G. Conroy, K.D. Burris and G.E. Isom (West Lafayette, IN) . . . . . 21—28

Aroclor 1254 as a 2,3,7,8-tetrachlorodibenzo-*p*-dioxin antagonist: effects on enzyme induction and immunotoxicity (**A "window of antagonism" depends on both doses of compounds and on the specific mediated response**)
by R. Bannister, D. Davis, T. Zacharewski, I. Tizard and S. Safe (College Station, TX) . . . . . 29—42

The choroid plexus and cerebral vasculature as target sites for cadmium following acute exposure in neonatal and adult mice: an autoradiographic and gamma counting study (**After cadmium injection the small cerebral fraction of it is localised in the choroid plexus and cerebral vessels**)
by A.A. Valois and W.S. Webster (Sydney, Australia) . . . . . 43—55

Selective pancreatic toxicity of palmitoylpentachlorophenol (**PPCP causes focal spotty vacuolation and loss of pancreatic acini**)
by G.A.S. Ansari, B.S. Kaphalia and P.J. Boor (Galveston, TX) . . . . . 57—63

Alterations of lipid synthesis in the normal and dysmyelinating trembler mouse sciatic nerve by heavy metals (Hg, Pb, Mn, Cu, Ni) (**Different heavy metal ions affect the synthesis of lipids in vitro in a different manner**)
by I. Cloëz, O. Dumont, M. Piciotti and J.M. Bourre (Paris Cedex, France) 65—71

The effect of griseofulvin on the heme pathway. Studies on tissue explant cultures (**Added in vitro, griseofulvin has no effect on porphyrin metabolism in skin, but has after in vivo exposure**)
by E. Vazques, S. Afonso, A.M. Buzaleh, N. Navone, C. Polo, E. Schoua and A. Batlle (Buenos Aires, Argentina) . . . . . 73—82

Developmental toxicity of halogenated acetonitriles: drinking water by-products of chlorine disinfection (**Trichloroacetonitrile and dichloroacetonitrile reduce fertility, increase early implantation failure and in surviving litters reduce birth weight**)
by M.K. Smith, E.L. George, H. Zenick, J.M. Manson and J.A. Stober (Cincinnati, OH, Washington, DC and Philadelphia, PA) . . . . . 83—93

The hepatotoxic potential of a Prudhoe Bay crude oil: effect on mouse liver weight and composition (**A crude oil rich in aromatic hydrocarbons produces liver hypertrophy**)
by S. Khan, M. Irfan and A.D. Rahimtula (Newfoundland, Canada) . . . . . 95—105

Effects of vitamin A and/or thyroidectomy on liver microsomal enzymes and their induction in 2,3,7,8-tetrachlorodibenzo-*p*-dioxin-treated rats (**It is concluded that thyroid hormones and Vit. A influence TCDD toxicity by mechanisms not involving liver MFO induction**)
by K. Rozman, J.R. Gorski, D. Dutton and A. Parkinson (Kansas City, KS and Neuherberg, F.R.G.) . . . . . 107—117
Contents of journals relating to Toxicology . . . . . 119—121

Papers from the joint ASPET/SOT Symposium on "Neurotoxic Chemicals as Probes and Models of Neurological Disorders"

Foreword 123
The pathophysiology of proximal neurofilamentous giant axonal swellings: implications for the pathogenesis of amyotrophic lateral sclerosis
by B.G. Gold (Piscataway, NJ) ..... 125—139
Kainic acid as a tool to study the regulation and function of opioid peptides in the hippocampus
by J.S. Hong, L. Grimes, T. Kanamatsu and J.F. McGinty (Research Triangle Park, Chapel Hill and Greenville, NC and Tokyo, Japan) ..... 141—157
Colchicine as an investigative tool in neurobiology
by H.A. Tilson and N.J. Peterson (Research Triangle Park, NC) ..... 159—173

Research Papers

Effects of inhaled cholinesterase inhibitors on bronchial tonus and on plasma and erythrocyte acetylcholine esterase activity in rats (**Plasma cholinesterase activity is a more sensitive parameter for insecticide, toxicity than alterations in pulmonary function**)
by J. Pauluhn, L. Machemer and G. Kimmerle (Wuppertal, F.R.G.) ..... 177—190
Morphology and release of lysozyme following exposure of rabbit lung macrophages to nickle or cadmium in vitro (**Nickel decreases the lysozyme activity while cadmium has no effect**)
by M. Lungborg, A Johansson and P. Camner (Stockholm, Sweden) ..... 191—203
Developmental toxicity of EDS recycle solvent and fuel oil (**EDS liquids affect perinatal and survival and growth but, at non-toxic doses, are not teratogenic**)
by R.H. McKee, S.J. Pasternak and K.A. Traul (Millstone, NJ) ..... 205—215
A cytochemical study of the livers of rats treated with diethylnitrosamine/phenobarbital, with benzidine/phenobarbital, with phenobarbital, or with clofibrate (**Of many enzymes studied two dehydrogenases and 5′-nucleotidase are the best markers for precarcinogenic hepatic changes**)
by P. Mompon, P. Greaves, E. Irisarri, A.M. Monro and J.W. Bridges (Amboise, France) ..... 217—236
A statistical test for synergism of two cell growth inhibitors (**It is recommended that the *t*-test be used to guard against the possibility of even a small bias**)
by P. Bloomfield and B. Eastwood (Raleigh, NC) ..... 237—245
Contents of journals relating to Toxicology ..... 247—250
Biochemical effects on combined gases of nitrogen dioxide and ozone. I. species differences of lipid peroxides and phospholipids in lungs (**Species differences are related to antioxidant content and phospholipid composition of the lung**)
by M. Sagai, K. Arakawa, T. Ichinose and N. Shimojo (Ibaraki, Japan) ..... 251—265
Assessment of the potential reproductive and subchronic toxicity of EDS coal liquids in Sprague—Dawley rats (**Repeated exposure to EDS coal liquids had no detectable effect on reproductive capacity and no systemic toxicity**)
by R.H. McKee, R.T. Plutnick and K.A. Traul (East Millstone, NJ) ..... 267—280
Ethylnitrosourea treatment increases lectin binding to mouse germ cells (**Flow cytometry analysis of dual-labeled testis cells reveals germ cell damage**)

by M.S. Holm, A.E. Berger, K. Swanson, G. Ficsor and L.C. Ginsberg (Kalamazoo, MI) 218–294

Subchronic treatment of rats with aurothioglucose; effects on plasma, hepatic, renal and urinary zinc, copper and metallothionein **(During subchronic exposure to gold, renal metallothionein reaches a plateau in the fourth week)**
by K.J. McVety and Z.A. Shaikh (Kingston, RI) 295–306

Skin effects of trichothecenes and their amelioration by decontamination **(The trichothecenes severely damage animal skin but can be successfully removed by polyethylene glycol)**
by S. Fairhurst, S.A. Maxwell, J.W. Scawin and D.W. Swanston (Wilts, UK) 307–319

Examination of the reproductive effects of tricresyl phosphate administered to Long-Evans rats **(TCP produced abnormal sperm morphology in males and decreased the number of females delivering live young)**
by B.D. Carlton, A.H. Basaran, L.E. Mezza and M.K. Smith (Cincinnati, OH) 321–328

Acute tabun toxicity; biochemical and histochemical consequences in brain and skeletal muscle of rat **(Tabun causes prolonged AChE inhibition, progressive development of muscle necrosis and uniform AChE inhibition in different brain areas)**
by R.C. Gupta, G.T. Patterson, W.-D. Dettbarn (Nashville, TN) 329–341

Effects of various pretreatments on the acute nephrotoxic potential of styrene in Fischer-344 rats **(Glutathione concentrations and conjugating activity may be important determinants of styrene nephrotoxicity)**
by S.K. Chakrabarti and B. Tuchweber (Montreal, Canada) 343–356

Contents of journals relating to Toxicology 357–360
